

Enrollment Notice

Congratulations!

You can reduce your energy costs and support community solar resources.

You are eligible to participate in the North Shore Community Solar Program!

We've completed our analysis based on your historic electricity usage, and we're excited to report that if your account is served by ComEd's bundled electricity supply service; we have determined that you are eligible to **save money** and participate in the community solar project with a customized subscription size of **██████ kW** (kilo-Watts) for your account ending in **██████**.

Based on this subscription size, we estimate that you would receive annual net metering credits based on **██████ kWh** (kilo-Watt hours) of electricity generated by the community solar project in the first year of the community solar program.*

Sample Monthly Savings Calculation	
Community Solar Supply Credit	\$XX
Payment to mc ² (80%)	- \$XX
<hr/>	
Your Net Savings (20%)	\$XX

Further, if you were on the community solar program for the last year, based on the monthly published rates for the net metering credits from ComEd and the estimated production of **██████ kWh** based on your customized subscription size, your portion of the net metering credits at the 20% guaranteed savings level would have generated a net savings of **\$██████** to you with no upfront or monthly minimum requirements.*

Enroll Today. Don't Wait. Limited-Time Offer.

If you would like to start saving money and participate in the North Shore Community Solar Program as a subscriber, click on the link below to complete the enrollment process. The enrollment process is secure, customized for your account, and will only be available for 5 business days after which your link will expire, and we will select the next eligible person on the waitlist.
