

Water Service Inspection Requirements

This notice is to advise you of new State of Illinois Plumbing Code requirements for water tap connections and requirements for water tap inspections.

Effective April 1, 2018, all new right-of-way connections must be supervised by an Illinois Licensed Plumber, (225 ILLCS 320/1) and must be inspected by an Illinois Licensed Plumbing Inspector (Section 890.1910 and 1920).

The following requirements will be enforced:

- The Plumbing Contractor must call the Village permit line at least 48 hours in advance at (847) 904-4320 to request an inspection. Please have the service address and building permit number ready for reference during the call.
- An Illinois Licensed Plumber must be on site during the inspection.
- The Illinois Licensed Plumber must present their Illinois license to the inspector, per ILPC Section 750.730 (b)(2)(F).

Please contact Joseph Footlik, Inspectional Services Division Manager, at (847) 904-4323 with any questions.

Thank you for your attention to these new requirements.
